

SUBJECT SHEET · S03 · S04 · 02a unaided, 02b with Vigil

- Unaided on 02a, S03 opened a threat first, escalated the threat with 1.2 km to spare, in 1 look over the whole run.
Nothing else was escalated.
- With Vigil on 02b, S04 opened a threat first, escalated the threat with 1.2 km to spare, in 2 looks over the whole run.
Nothing else was escalated.

UNAIDED · frozen at the moment of escalation — 0:58

The subject's selection sequence from the run JSON, replayed as a path. 1 look.

"never opened" marks the engine's above-calm tracks at the freeze that the run never opened: the analyst's overlay, drawn on both conditions; raw's screen never showed that set.

Look #1 · 0:14 — opened UAS-8F21 (the threat) · Remote ID.
Look #1 · 0:49 — assessed UAS-8F21 (the threat).
Look #1 · 0:58 — escalated UAS-8F21 (the threat) 1.2 km outside the ring · 1:06 before entry, ring entry 2:04.

WITH VIGIL · frozen at the moment of escalation — 0:58

The subject's selection sequence from the run JSON, replayed as a path. 2 looks over the whole run, 1 to the freeze.

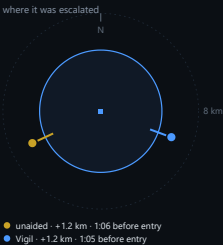

"never opened" marks the engine's above-calm tracks at the freeze that the run never opened: the analyst's overlay, drawn on both conditions; raw's screen never showed that set. A look after the freeze is drawn as a dashed outline on a dashed path, and one the regenerated picture no longer holds is not drawn at all: the background picture, the Queue box and every reading are the frozen second's.

Queue at 0:58 · 5 above calm
1 TRK-11 72 · Remote ID mismatch, closing, near PHL Airfield
2 TRK-12 64 · Revisiting, non-cooperative, near PHL Airfield
3 TRK-13 58 · Non-cooperative, near PHL Airfield, low and slow
4 UAS-BEEC 49 · Closing, near PHL Airfield, low and slow
5 UAS-CF19 45 · Closing, near PHL Airfield, low and slow

Look #1 · 0:14 — opened TRK-11 (the threat) · Remote ID, reading UAS-8F21 then.
Vigil read it rank 3 · caution 47 · closing at 18 m/s · ring entry in 1:48.
Look #1 · 0:49 — assessed TRK-11 (the threat).
Look #1 · 0:58 — escalated TRK-11 (the threat) 1.2 km outside the ring · 1:05 before entry, ring entry 2:03.
frozen at 0:58
Look #2 · 1:20 — opened TRK-11 (the threat) · sensor.
4 candidates never opened.

the threat

unaided 02a UAS-8F21 · with Vigil 02b TRK-11

The two runs are different scenarios of one family. The time axis runs the longer window (6:00); each lane carries its own entry and its own end.
The ring panel is north up, the site at its centre, the 5 km ring on an 8 km panel: each condition's mark is where that threat stood when it was escalated — hollow inside the ring — and the thick tick is where that scenario's threat crossed. Standoff is the range less 5 km, signed.
